

Containerships selects UNIT45

The full-service logistics company Containerships provides safe, fast and environmentally friendly door-to-door container transportation in the Baltics extending to the Mediterranean Sea. Containerships is growing rapidly, starting up new service lines and expanding their fleet.

To meet this excessive growth Containerships has added a large amount of containers to their fleet and has chosen UNIT45 to provide so. The investment includes 800 plus 40ft and 700 plus 45ft dry containers. Adding also 150 electric reefers and a large number of rental containers from UNIT45's rental fleet.

Currently Containerships plc and Container Finance Ltd Oy have signed an agreement with CMA CGM, becoming a part of the CMA CGM group, the 3rd biggest container shipping line in the world.
